3M™ Electrical Tapes

3M has been developing and manufacturing high performance, easy handling electrical tapes since the 1940s. The 3M Electrical Tapes range includes insulating and sealing tapes for protective jacketing, moisture sealing, electrical insulation, harnessing and colour coding. The selection chart below highlights the most commonly used tapes.

### PVC Electrical Tapes

Provide mechanical protection and low voltage electrical insulation

</table>

Taping Tips

To ensure the safest, most reliable use of PVC Electrical Tapes, always:

- Apply tape with enough stretch to conform to the objects you’re wrapping. Be sure to let the last 50mm relax before tabbing it down to prevent unwinding (sometimes called “flagging”).
- Wrap an irregular mechanical connector, such as a split bolt, with rubber or mastic tape to pad sharp edges, before overwrapping it with vinyl electrical tape.
- Wrap cone-shaped (high voltage splices) “uphill” — that is, from the smallest to the largest point. This way you always secure the previous layer.
- Always use scissors or a knife to cut tape. If you must tear it by hand, then keep fingers close together when tearing tape. The farther apart they are, the more the tape will stretch before it tears.
- Use the right tape for the right conditions. Vinyl tapes are rated for cold-weather application in two classes: 0°C and -18°C. Tapes formulated for high-temperature environments are typically rated 80°C or 105°C.

Wrapping Tips

<table>
<thead>
<tr>
<th>Type of Tape</th>
<th>Number of Layers/Application Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Vinyl Electrical Tapes</strong> - Jacketing and Mechanical Protection</td>
<td>Always use a minimum of two half-lapped layers. The last layer should be wrapped in a more relaxed manner - let the last wrap relax to prevent the layer from flagging.</td>
</tr>
<tr>
<td><strong>Rubber Tapes</strong> - Electrical Insulation, Mechanical Padding, Water Sealing and Shaping</td>
<td>Wrap tape tightly to achieve the watertight seal. Rubber tapes are typically overwrapped with vinyl tape.</td>
</tr>
<tr>
<td><strong>High Voltage Tapes</strong> - Insulating and Semi-conductive Layers</td>
<td>Apply outside of roll to the cable, in highly stretched half-lapped layers. Never use a semi-conductive tape as an insulation.</td>
</tr>
<tr>
<td><strong>Mastic Compounds</strong> - Insulating, Mechanical Padding, Moisture Sealing and Shaping</td>
<td>Mastic compounds are to be overwrapped with vinyl tapes to initiate flow and watertight seal. Do not apply excessive amount of mastic to prevent oozing.</td>
</tr>
</tbody>
</table>
Vinyl Electrical

Heavy Duty
Scotch® Heavy Duty Vinyl Electrical Tape 22

Product Description
Scotch® Heavy Duty Electrical Tape 22 is a premium grade, 0.25mm thick, vinyl insulating tape. It is designed to perform continuously in ambient temperatures up to 80°C. The tape is conformable for cold weather applications down to –10°C. It has excellent resistance to abrasion, moisture, alkalies, acids, corrosion and varying weather conditions. The combination of elastic backing and aggressive adhesive provides moisture tight electrical and mechanical protection with minimum bulk. Scotch® Heavy Duty Electrical Tape 22 tape is an Underwriters’ Laboratories Listed and Canadian Standards Association Certified “Insulating Tape”.

Applications
• Primary electrical insulation for all wire and cable splices rated up to 600 volts and 80°C.
• Primary electrical insulation for 600 volt bus applications, and protective jacketing for low and high voltage bus.
• Protective jacketing for high voltage cable splices and repairs.
• Harnessing of wires and cables.

Professional Use
Scotch® Professional Use Premium Vinyl Electrical Tape Super 88

Product Description
Scotch® Vinyl Electrical Tape Super 88 is a premium grade, 0.22mm thick, all-weather vinyl insulating tape. It is designed to perform continuously in ambient temperatures up to 105°C. The tape is conformable for cold weather applications down to –18°C. It has excellent resistance to abrasion, moisture, alkalies, acids, corrosion and varying weather conditions. The combination of elastic backing and aggressive adhesive provides moisture-tight electrical and mechanical protection with minimum bulk. Scotch® Vinyl Electrical Tape Super 88 is an Underwriters’ Laboratories Listed and Canadian Standards Association Certified “Insulating Tape”.

Professional Use
Scotch® Super 33+™ Premium Vinyl Electrical Tape

Product Description
Scotch® Super 33+™ is highly conformable and super stretchy in all-weather applications. This tape provides flexibility and easy handling for all-around performance. It combines PVC backing with excellent electrical insulating properties to provide primary electrical insulation for splices up to 600V and protective jacketing. UL Listed and CSA Certified. Excellent resistance to UV rays, abrasion, moisture, copper corrosion, alkalis and acids, and is flame-retardant. Excellent all-weather performance in cold to -18°C and is designed to perform in a continuous temperature environment up to 105°C.

Applications
- Primary electrical insulation for all wire and cable splices rated up to 600 volts and 105°C.
- Primary electrical insulation for 600 volt bus applications, and protective jacketing for low and high voltage bus.
- Protective jacketing for high voltage cable splices and repairs.
- Harnessing of wires and cables.

Professional Use
Scotch® Premium Vinyl Electrical Tape 35

Product Description
Scotch® Vinyl Electrical Color Coding Tape 35 is used in phase identification, color coding leads and piping systems and for marking safety areas. This tape is abrasion- and weather-resistant, with excellent mechanical and electrical insulation properties that wraps smoothly and holds tight over a wide range of temperatures. UL Listed and CSA Certified, and is flame-retardant. Excellent all-weather performance in cold to 0°C or hot to 105°C.

Applications
- Color coding for phase identification, job identification and safety.
- Insulating electrical wiring (up to 600 volts).
- Protecting electrical conductors, motor leads and piping from moisture, alkalis, acids, corrosion, abrasion and weather.

Scotch® Super 33+™ and Scotch® 35 Professional Grade PVC Electrical Tape

This is the good stuff.
3M™ Temflex™ General Purpose Vinyl Electrical Tapes 1610

Product Description

3M™ Temflex™ General Purpose Vinyl Electrical Tapes 1610 is a quality, economical, general purpose vinyl insulating tape, available in a range of colours. Temflex™ 1610 is designed for use in phase identification, colour coding of motor leads and piping systems and for marking safety areas. It has excellent resistance to abrasion, moisture, alkalies, acid and varying weather conditions. It has high wet dielectric strength, is comfortable, and provides excellent mechanical protection with minimum bulk.

Applications

Protective jacketing for high voltage cable splices and repairs.
• Harnessing of wires and cables.
• For indoor or outdoor applications.
• For above or below grade applications.
• Color coded for job identification and safety.

**Product Description**
Scotch® General Use PVC Electrical Tape 1710 is a flexible, general purpose tape with good cool temperature adhesion. It has good resistance to: abrasion, moisture, alkalies, acids and varying weather conditions. It is a UL listed and CSA Certified “Insulating Tape”.

**Applications**
- Primary electrical insulation for all wire and cable splices rated up to 600 volts.
- Protective jacketing.
- Harnessing of wires and cables.
- Colour coding.

**Insulating and Splicing**

**Linerless Splicing**

**Scotch® Linerless Rubber Splicing Tape 130C**

**Product Description**

Scotch® 130C Linerless Rubber Splicing Tape meets industry specifications and has excellent physical and electrical properties which provide immediate moisture seal and void-free buildups. This tape is rated up to 90°C continuous operating temperatures and short term 130°C overload service. This tape should be applied like any rubber tape: that is, the side of the tape wrapped inside the roll should be applied outside on the splice (tacky side up). This will help prevent the roll from getting progressively further away from the work area.

**Applications**

- Primary insulation for splicing all types of solid dielectric insulated cables through 69 kV
- Primary insulation for building stress cones on all types of solid dielectric insulated cables up to 35 kV
- Jacketing (secondary insulation) on high-voltage splices and terminations
- Moisture-sealing electrical connections
- Bus bar insulation

**Linered Splicing**

**Scotch® Rubber Splicing Tape 23**

**Product Description**

Scotch® Rubber Splicing Tape 23 is a highly conformable self-fusing EPR (Ethylene Propylene Rubber) based, high voltage splicing tape. It is a non-vulcanising, shelf-stable tape with excellent electrical properties. 23 Tape can be used as an insulation for low-voltage applications as well as an insulation for splices up to 69kV.

**Applications**

- Primary electrical insulation for splicing cable from 600V to 69kV on all solid dielectric cables.
- Primary insulation for building stress cones on cables up to 35kV on all solid dielectric cables.
- Jacketing on high-voltage splices and terminations.
- Moisture sealing electrical connections.
- Bus bar insulations.
- End sealing high-voltage cables.

Semi-conducting
Scotch® Electrical Semiconducting Tape 13

Product Description
The soft, black rubber tape is a 0.762mm thick, highly conformable, semi-conducting EPR (Ethylene Propylene Rubber) based high-voltage splicing tape. It is non-vulcanising and shelf stable, with stable conductivity over a wide temperature range. Its conductivity is not affected, except by low-viscosity oils. The conductivity of cable semi-conducting jackets is not affected by 13 Tape.

Applications
- Electrically rounds-off high voltage connectors and lugs
- Provides screen continuation for high voltage joints and terminations
- Replaces semi-conducting layer beneath metallic shield of damaged cables
- Forms conductive portion of stress cones

Shielding
Scotch® Electrical Shielding Tape 24

Product Description
Scotch® 24 Electrical Shielding Tape is an all-metal, open-weave, conformable shielding braid tape in a flat, cable-like form.

Applications
- To provide shielding for cable joints on shielded power cables
- To make the conductive portion of the stress cone on power cable terminations
- To smooth connector area in oil-filled cables

Shielding
Scotch® Electrical Grounding Braid 25

Product Description
Scotch® 25 Electrical Grounding Braid is a flat, all-metal woven electrical grounding braid that is compatible with all power cable insulations and high-voltage splicing and terminating materials.

Applications
- To provide a fault current patch across shielded cable joints
- For grounding high-voltage splices, terminations, cables or other cable accessories

**Self-fusing Scotch® Silicone Rubber Electrical Tape 70**

**Product Description**
Scotch® Brand 70 Silicone Rubber Electrical Tape is a high-temperature arc and track-resistant tape composed of self-fusing, inorganic silicone rubber and easy tear and easy-strip liner.

**Applications**
- As an overwrap for protection of terminating high-voltage cables against arcing and tracking. High-voltage cables with these insulations should be overwrapped:
  - Butyl rubber
  - Oil-base rubber
- ...Ethylene propylene rubber
- ...PVC
- ...Low and high-density polyethylene cross-linked

**Cambric Tape Scotch® Varnished Cambric Tapes 2510 and 2520**

**Product Description**
Scotch® Varnished Cambric Tapes are made from straight-cut woven cotton cambric fabric. The fabric is oil primed and coated with a high-grade yellow electrical insulating varnish. Varnished cambric tapes are flexible, electrically insulating and moisture resistant with a smooth finish. 2510 tape is yellow, non-adhesive coated and 0.18mm thick. 2520 tape is yellow with a pressure-sensitive adhesive and 0.20mm thick. They are designed to perform continuously in temperatures up to 105°C with excellent resistance to abrasion, puncture and cut-through. The adhesive on 2520 tape holds the tape in position after application.

**High Temperature Scotch® Glass Cloth Electrical Tapes 27**

**Product Description**
3M™ Glass Cloth Electrical Tape 27 is a 7-mil woven insulating glass cloth tape with pressure-sensitive rubber thermostetting adhesive. This tape is designed to operate in 600-volt dry applications requiring high mechanical strength and resistance to high temperatures. The glass cloth is specially treated and prepared to provide corrosion-free protection. The glass cloth will not shrink, rot or burn, has a high tensile strength and is printable.

High Temperature
Scotch® Glass Cloth Electrical Tapes 69

Product Description
Scotch® 69 Glass Cloth Electrical Tape is a white glass cloth tape with a high-temperature thermosetting silicone adhesive. The thermosetting adhesive provides an increased bond once applied in areas of high ambient temperatures. 69 Tape is UL recognized for continuous use up to 200°C.

Applications
- Insulating electric and induction type furnace power supply leads
- Securing high temperature, non-PSA insulations in high temperature areas
- Securing Scotch 77 Fire Retardant Electric Arc Proofing Tape
- Replacing 3M 27 Glass Cloth Electrical Tape in locations where a higher-temperature tape is needed
- Reinsulating and repairing coils on mining machines
- Reinforcing insulation in electrical installations where heavy loads cause high heat and breakdown of original insulation (e.g. motor control exciter feeds)
- Splicing silicone-covered glass wire where splices require more abrasion resistance and mechanical strength than can be provided by silicone tapes
- Insulating Class “H” dry-type transformer leads

Repairing
3M™ Armorcast™ Structural Material 4560

3M™ Armorcast Structural Material is a flexible fiberglass knit fabric strip saturated with black resin syrup then dried. It forms a tough durable covering that cures in just twenty minutes.

Packed (rolls) dry in a sealed foil envelope. Resistant to moisture, fungus, acid, alkali, ozone, sunlight, gasoline and high temperatures. It combines long life and very little maintenance.

### Rubber Mastic Tape

**Scotch® Rubber Mastic Tape 2228**

**Product Description**
Scotch Rubber Mastic Tape 2228 is a conformable self-fusing rubber electrical insulating and sealing tape. Scotch® Rubber Mastic 2228 consists of Ethylene Propylene rubber (EPR) backing coated with a strong, temperature-stable mastic adhesive. The tape is 1.7mm thick for quick application build-up. It is designed for electrical insulating and moisture sealing applications.

*For best UV protection, overwrap with Scotch® Super 33+™ Vinyl Electrical Tape*

**Applications**
- Primary electrical insulation for cable and wire connections rated up to 1000 volts
- Electrical insulation and vibration padding for motor leads rated up to 1000 volts
- Padding for irregular shaped bus bar bolted connections
- Moisture seal for cable and wire connections
- Moisture seal for service drops
- Moisture seal for ground wire and rod connections
- Jacket seal on power cable applications

### Mastic Tape

**3M™ Scotch-Seal™ Mastic Tape Compound 2229**

**Product Description**
3M Scotch-Seal Mastic™ Tape Compound 2229 is designed for quick and easy insulating, padding and sealing of electrical connections. It is a conformable, durable, tacky mastic with an easy release liner for easy applications over irregular surfaces and provides excellent moisture resistance. It features superior self-healing characteristics after being punctured or cut.

*For best UV protection, overwrap with Scotch® Super 33+™ Vinyl Electrical Tape*

**Applications**
- Sealing high-voltage cable splice and termination accessories for 90°C continuous operating temperature
- Insulating electrical connections rated up to 1000 volts if over wrapped with vinyl or rubber electrical tape
- Padding irregular-shaped connections
- Providing corrosion protection to a wide variety of electrical connections and applications
- Sealing ducts and cable ends
- Sealing against dust, soil, water and other environmental conditions

Mastic Tape

3M™ Scotchfil™ Electrical Insulation Putty

Product Description
3M™ Scotchfil™ Electrical Insulation Putty can be wrapped, stretched or molded around irregular shapes for quick, smooth insulation build-up. Use 3M™ Scotchfil™ Putty to insulate connections up to 600 volts and to round out high-voltage connections to gear, smooth bus bar irregularities, and make a moisture seal at ground wire exits in high-voltage splices. UL Recognized Component listing for 80°C when used in combination with Scotch(TM) Super 33™ or Scotch® Super 88 Tapes

Applications
- To insulate low voltage (600 volts and less) connections
- To build up cable splices and fill out major irregularities and voids in low voltage splices (2300 volts and less) in order to obtain a uniform base for further taping
- To round out high voltage connections
- To smooth bus bar irregularities
- To create a resin dam in resin pressure splices
- To create a moisture seal at ground wire exit in high voltage splices
- To moisture seal multiconductor cable connections

Vinyl Mastic Tape

Scotch® Vinyl Mastic Tape VM

Product Description
Scotch® Vinyl Mastic Tape VM is a rubber based mastic laminated to an all-weather 0.18 mm vinyl, which provides double duty protection in one wrap. Vinyl Mastic (VM) tape seals out moisture and protects against corrosion without the need for heating tools or using multiple tapes.

Applications
- Communications cable sheath repair
- Splice case and load coil case protection
- Auxiliary sleeve and cable reel end sealing
- Drop wire insulating
- Conduit repair
- Protection of CATV components

Sizes (2200 Pads)
114mm x 165mm
Backing and Mastic: * Thickness 3.2mm

Vinyl Mastic Tape

Scotch® Vinyl Mastic Pads 2200

Product Description
Scotch® Vinyl Mastic Tape VM is a rubber based mastic laminated to an all-weather 0.18 mm vinyl, which provides double duty protection in one wrap. Vinyl Mastic (VM) tape seals out moisture and protects against corrosion without the need for heating tools or using multiple tapes.

Applications (600 volt maximum)
- Bolted connections
- Service drops
- Traffic signal wire connections
- Lighting connections
- Transformer bushing protection
- Padding bolted connections on bus bar
- Terminal protection
- Cable end sealing
- Secondary compression connections

**Heavy Duty Mastic Tape**

*Scotch® Heavy Duty Mining Tape 31*

**Product Description**

Scotch® 31 Heavy Duty Mining Tape has a tough, abrasion resistant backing for jacket repair on mining and industrial cables. In extreme mining environments, the original jackets on electrical cables are subject to continual damage. MSHA approved Scotch® 31 Heavy Duty Mining Tape offers an innovative solution for fast cable repair. With its tough backing, abrasion resistant properties and self-healing, flame retardant mastic, 31 tape applies easily and remains flexible while maintaining a strong moisture & dust seal.

**Applications**

- Repair of mining cables and outer jacket of mining cable splice kits
- Repair and splicing of mine conduit

**Special Use Tapes**

**Corrosion Protection**

*3M™ Scotchrap™ 50 and 51 Tape - All Weather Corrosion Protection*

**Product Description**

Scotchrap™ 50 and 51 Tapes are tough, PVC (polyvinyl chloride) based tapes with high tack adhesives that resist corrosion of metal piping systems above and below the ground. Both tapes apply a wide temperature range, are resistant to impact, abrasion and punctures.

**Applications**

- Corrosion protection of pipes, conduits and fittings.

**Friction Protection**

*3M™ Temflex™ Cotton Friction Tape 1755*

**Product Description**

3M™ Temflex™ Friction Tape 1755 is a high-grade, black friction tape designed to provide mechanical protection against abrasion and cut-through for cable, wire splices and connections insulated with rubber electrical tape. The 0.33mm thick tape is composed of a high-quality cotton fabric, coated on both sides with an electrical-grade, solvent-free, rubber adhesive. 1755 Tape has high break strength and low stretch, making it ideal as a heavy-duty binding and harnessing tape.

**Applications**

- Abrasion and cut-through protection on wire and cable splices.
- Mechanical protection for rubber electrical tape.
- Bundling, binding and spot holding on wire harnesses.
- Protection on sharp edges, to prevent scratching or cut through.

### Foil Tape
#### 3M™ Copper Foil Tape 1181

**Product Description**
3M Copper Foil Tape 1181 consists of a 1-ounce deadsoft copper foil backing and a unique electrically conductive pressure-sensitive acrylic adhesive and is typically used for applications requiring excellent electrical conductivity from the application substrate through the adhesive to the foil backing. The copper foil backing is solderable and resists oxidation and discoloration.

**Applications**
- Grounding.
- EMI shielding.

### Foil Tape
#### Scotch® Foil Tape 3311

**Product Description**
Scotch® Foil Tape 3311 is an aluminium alloy foil with a pressure-sensitive adhesive and paper liner. The aggressive rubber adhesive sticks well to most surfaces and the paper liner makes for convenient and reliable use.

**Applications**
- Sealing joints and seams against moisture.
- General repairs and maintenance.

Double Sided Tape

3M™ Double Coated Urethane Foam Tapes
4004 • 4008 • 4016 • 4026 • 4032 • 4052 • 4056 • 4085

### Product Description
3M™ Double Coated Urethane Foam Tapes are conformable foams that offer high shear strength and are available with either a high temperature holding acrylic adhesive system or a rubber adhesive system for bonding to various types of surfaces for mounting, joining and holding.

### Applications
- Attachment of mouldings or trim
- Attachment of hooks, nameplates, signs

### Products
- 3M™ Double Coated Urethane Foam Tape 4004 ....... 6.4 mm thick
- 3M™ Double Coated Urethane Foam Tape 4008 ....... 3.2 mm thick
- 3M™ Double Coated Urethane Foam Tape 4016 ...... 1.6 mm thick
- 3M™ Double Coated Urethane Foam Tape 4026 ...... 1.6 mm thick
- 3M™ Double Coated Urethane Foam Tape 4032 ...... 0.8 mm thick
- 3M™ Double Coated Black Urethane Foam Tape 4052 0.8 mm thick
- 3M™ Double Coated Black Urethane Foam Tape 4056 1.6 mm thick
- 3M™ Double Coated Urethane Foam Tape 4085 ....... 1.1 mm thick

Double Sided Tape

3M™ VHB™ Tapes

### Product Description
3M™ VHB™ Tapes provide the convenience and simplicity of a tape fastener and are ideal for use in many interior and exterior bonding applications. In many situations, they can replace rivets, spot welds, liquid adhesives and other permanent fasteners.

### Applications
- Bonding metal panels to frames
- Sign assembly and attachment (indoor and out)

### Details & product selection:
See 3M™ VHB™ Tapes quick selection guide overleaf.

# Fast and effective bonding solutions

The 3M Double-Sided Foam Tapes range will help you find the right bonding solution for your requirements. Double-Sided Foam Tapes help seal, cushion and damp vibration, fill gaps and bond irregular surfaces.

For **lightweight bonding solutions** in an outdoor environment, 3M Soft Sealing Joining Tapes provide the perfect solution for bonding to uneven surfaces such as brick, concrete and wood. For indoor use, 3M Multi-purpose Mounting Tapes can be used on most surfaces and are ideal for attaching lightweight objects.

For **heavy duty bonding requirements**, VHBTM Tapes are a family of double-sided tapes made from high performance acrylic adhesives, providing excellent long term durability and holding power. VHBTM Tapes have been performing successfully in a wide range of long term and demanding applications for over 25 years, including sign assembly, bonding metal panels to frames and as a replacement for screws and rivets.

As well as a range of cost-effective general purpose VHBTM Tapes, 3M also offers a specialised range designed for tough applications such as cold temperature application; bonding to plastics, metals, glass and powdercoated paints; and where high temperature resistance is needed.

| | 4957 | 1.55mm | Grey | 149 deg C | High | Low | High | For high surface energy substrates.
| **High temperature firm acrylic foam adhesive** | 4611 | 1.1mm | Dark Grey | 232 deg C | High | Low | High | High temperature resistance.

---

**HSE** - High Surface Energy - eg metal, glass, some plastics (polyester, ABS, rigid PVC, polycarbonate, acrylic).

**LSE** - Low Surface Energy - eg some powder coated paints, polyethylene, polypropylene.
Selecting your Double-Sided Foam Tape

The 3M Double-Sided Foam Tape range provides a bonding solution to meet every requirement. Depending on the surface and gap to be filled, the temperature and application, the product you need will differ in each case. Follow the chart below to assist in choosing the correct tape for your needs.

N.B: If you have a requirement for thinner double-sided tapes, please refer to separate literature from 3M.
## Duct Tapes

### Clean Removal Duct

**3M™ Performance Plus Duct Tape 8979**

**Product Description**

3M™ Performance Plus Duct Tape 8979 provides clean removal with little or no sticky adhesive residue for up to 6 months from most opaque surfaces. Sunlight/UV and Water Resistant. Lasts 1 year without degrading. Tape construction consists of high tensile cloth and aggressive adhesive. Designed for permanent and temporary applications.

**Applications**

- Capping pipe and conduit ends.
- Hanging polythene sheeting.
- Sealing, holding, reinforcing.

### Heavy Duty Duct

**3M™ Cloth Tape 3939**

**Product Description**

3M™ Cloth Tape 3939 is composed of waterproof polyethylene film over cloth scrim backing with a rubber adhesive used for demanding duct tape applications.

**Applications**

- Taping and splicing insulation.
- Holding down power cables in trade shows.
- Hanging polythene sheeting.
- Patching, reinforcing, bundling.
- Moisture proofing, sealing.
- Temporary repair.
